WORK EXPERIENCE

As a MERN (MongoDB, Express.js, React.js, Node.js) stack developer, I designed and implemented interactive user interfaces using React.js while managing data with MongoDB. Additionally, I built efficient server-side APIs using Node.js and Express.js to ensure seamless data flow and a smooth user experience.
1).I am recently worked on "Ecommerce Website Project", In this project I am worked on Categories APIs, Products CRUD operation, Payment gateway APIs,, authentication and also performs on Sorting, pagination and Filter the Products category wise and price wise..
2).In my second project "Mern Stack Blood Bank App Project" I am worked on authentication, Hospital APIs, Organization APIs, Donar APIs, and manage 4 roles of Admin, Donar, Organization and Hospitals Role.
3).In last project "Job Portal Application", I am worked on Job APIs, User APIs, perform authentication, and manage 2 roles of jobs and user.
